RNRN The first direct-care RN national disaster network

RNRN deploys and provides support for volunteer nurses when disaster strikes. With RNRN, nurses can focus on providing patient care. RNRN takes care of everything else, raising funds to cover airfare, lodging and meals, and facilitating out-of-state licensure.

RNRN is conducting educational courses examining the RN's unique ability to be the driving force in pressing for universal healthcare and disaster preparedness/response standards.
